¹Contribution 2C01-02 from the Prince William Sound area. The Regional Information Report Series was established in 1987 to provide an information access system for all unpublished Divisional reports. These reports frequently serve diverse ad hoc informational purposes or archive basic uninterrupted data. To accommodate timely reporting of recently collected information, reports in this series undergo only limited internal review and may contain preliminary data; this information may be subsequently finalized and published in the formal literature. Consequently, these reports should not be cited without prior approval of the author or the Division of Commercial Fisheries.

AUTHORS

J. Johnson is an Assistant Area Management Biologist for the Alaska Department of Fish and Game, Division of Commercial Fisheries, Prince William Sound, P.O. Box 669, Cordova, AK 99574.

Denise Branshaw is an Administrative Clerk II for the Alaska Department of Fish and Game, Division of Commercial Fisheries, Prince William Sound, P.O. Box 669, Cordova, AK 99574.

ACKNOWLEDGEMENTS

The Alaska Department of Fish and Game, Computer Services section, developed the Fish Ticket System (Zephyr) used to generate the following reports. Programs were written by Richard Berning and Carmine DiCostanzo.

ABSTRACT

This report provides catch and effort statistics for the 2001 salmon fisheries in the Prince William Sound Management Area. The data is derived from fish ticket reports of salmon and herring sales and organized using a database software package provided by the Computer Services section of the Commercial Fisheries Division. The program's fish ticket reporting subsystem created the summary tables that were imported into Microsoft EXCEL97 for final editing. Prince William Sound produced a harvest of 41,142,011 salmon in 2001. Catch by species included 40,461 chinook, 2,261,097 sockeye, 494,135 coho, 35,246,424 pink and 3,099,794 chum salmon.

KEY WORDS: Prince William Sound Management Area, herring, salmon, catch, landings, effort

INTRODUCTION

The Prince William Sound Management Area encompasses the coastal waters and inland drainage of the northern Gulf of Alaska between Cape Suckling and Cape Fairfield (Figure 1). The area includes the Bering River, the Copper River and Prince William Sound along with a total adjacent land area of approximately 38,000 square miles.

The Prince William Sound area consists of eleven management districts and 55 statistical areas which correspond to the local geography and distribution of the five species of salmon harvested by the commercial fishery (Figures 2 through 10). The management objective for all districts is the achievement of desired escapement goals for major species while also allowing for the orderly harvest of all fish surplus to spawning requirements.

Legal gear for the salmon fishery includes purse seines and both drift and set gillnets. Drift gillnet fishers are the most numerous and are permitted to fish in the Bering River, Copper River, Coghill, Unakwik and Eshamy Districts. Set gillnet gear is legal only in the Eshamy District. Purse seine gear is legal in the Eastern, Northern, Unakwik, Coghill, Northwestern, Southwestern, Montague and Southeastern districts.

There are five hatcheries in the Prince William Sound Management Area: Solomon Gulch Hatchery in the Eastern District (Figure 3), Cannery Creek Hatchery in the Northern District (Figure 4), Wally Noerenberg Hatchery in the Coghill District (Figure 5), Main Bay Hatchery in the Eshamy District (Figure 7), and Armin F. Koernig Hatchery in the Southwestern District (Figure 8). In 2001, cost recovery harvests to defray operating costs totaled 13,915,196 salmon, mostly pink salmon.

The Prince William Sound area has five different herring fisheries. The Prince William Sound Herring Management Plan defines the herring management year as July 1 through June 30. The sac roe fisheries occur in the spring and the food/bait fishery is in the fall. The harvest of naturally occurring herring spawn on kelp and the food/bait fishery do not require a limited entry permit; all other herring fisheries do.

METHODS

A fish ticket is generated each time a commercial fisher sells his or her catch in the Prince William Sound Management Area. These tickets are legal documents and are required by regulation. The Cordova office of the Alaska Department of Fish and Game receives the fish tickets from buyers and then enters them into the Fish Ticket System.

The Fish Ticket System, known as "Zephyr" designed by Commercial Fisheries Computer Services, is software that includes programs for:

- (1) entry of commercial fisheries fish ticket data,
- (2) correction of fish ticket records,
- (3) transfer of fish tickets to centralize the state database,
- (4) providing reporting data to area office and regional staff,
- (5) various utilities to help accomplish the above and to maintain the database efficiently.

Computer Services also provides an Operators Manual that describes the functions of the components of the system (ADF&G 2001).

The two main goals of the Fish Ticket System are to provide access to the fish ticket data at the Cordova office and to provide error-free transfer of data to Divisional Headquarters for inclusion in the statewide database.

Once a fish ticket reaches the Cordova office, department staff edits, batches and keys into the computer the fish ticket information. In support of these activities, editing tables and verification reports are maintained.

RESULTS

In the Prince William Sound Management Area, 41,142,011 salmon were landed in 2001 (Tables 1, 2, 3 and 4). Of the 541 drift gillnet permit holders (Commercial Fisheries Entry Commission, Juneau, personal communication), 535 or 99 percent made at least one landing in 2001. Drift gillnet permit holders landed a total of 4,078,784 salmon. Tables 9 through 55 details drift gillnet catch by district, statistical area, period, catch date or statistical week.

Of the 32 salmon set gillnet permit holders (Commercial Fisheries Entry Commission, Juneau, personal communication), 32 or 100 percent made at least one landing in 2001. Set gillnet permit holders landed 311,885 salmon. Tables 56 through 66 details set gillnet catch by district, statistical area, period, catch date or statistical week.

Of the 268 salmon purse seine permit holders (Commercial Fisheries Entry Commission, Juneau, personal communication), 152 or 57 percent participated in the 2001 season by making at least one landing. Purse seine landings in 2001 totaled 22,828,162 salmon. Tables 69 through 150 details the purse seine catch by district or statistical area, by period, catch date or statistical week.

The hatcheries in Prince William Sound sold 13,915,196 salmon. Roe sales are footnoted by hatchery. Tables 151 through 155 detail the hatchery sales by district and catch date.

The Cordova High School has a special use educational permit. This special use permit was not used this year.

In 1994, the Board of Fisheries passed regulation 5 AAC 24.356 requiring all chinook salmon caught and retained for personal use in the Copper and Bering River Districts to be reported on fish tickets. Tables 156 and 157 detail the personal use catch by species and catch date.

Table 158 lists the salmon confiscated by the state; 110 sockeye salmon, 75 coho salmon, and 1,702 chum salmon were confiscated for illegal fishing violations. Table 159 lists salmon harvested in common property fisheries and donated, while table 160 details the harvest of salmon from department test fisheries. Table 161 details Eulachon catch by day in the Copper River test fishery.

In April, the estimated herring spawning biomass was above the minimum threshold level needed to open any of the herring fisheries in Prince William Sound. However, the spring seine and drift gillnet sac roe, herring pound fishery, wild spawn on kelp and food/bait herring fisheries were not conducted in 2001 due to low numbers of herring returning to PWS this spring.

Beginning in 1989, harvest codes were included in fish ticket information to help specify the type of harvest. In 2000 the following harvest types were used: traditional common property fisheries, confiscated catch, private hatchery harvest, donated fish, and salmon roe sale.

Beginning in 1992, delivery codes were included in fish ticket information to help specify the type of delivery. During 2001 the following delivery types were used: whole fish/food fish, donated and home use.

The department altered the Copper River District's (District 212) statistical area boundaries in 1988. Before 1988 there were only three statistical areas describing the district (212-10, 212-20, and 212-30). The department's revised six statistical areas (212-11, 212-15, 212-21, 212-25, 212-31, 212-35) are used to document inside and outside area catches within the original pre-1988 boundaries.

The Unakwik District (District 229) statistical area code was changed in 1989 to reflect consistency in district coding convention. Prior to this time it was the only district in the Prince William Sound Management Area that did not have a unique three-digit district code. In 1991, one new statistical area (222-35) was created in the Northern District. This new area encompasses what previously was statistical area 224-20, and portions of 222-30 and 224-40.

When using the following tables, be aware there could be some inaccuracies associated with locations and catches as reported on fish tickets.
